Yes we do anticipate that the draft report will be provided to EPA within the next quarter.

Bob,

Can you answer this question???

Thanks,
Phil Allen

Phil,

I am trying to budget out my time for the next three months. Do you anticipate receiving the sediment transport modeling report from QEA sometime in the next three months?

Thanks,
Earl

Subject
USACE review of sediment modeling
for the Patrick Bayou Superfund
site

Steve,

I am the RPM for the subject site; and Dr. Hayter of the USACE has informed me that there is a "master" IAG set up for help on sediment sites.

I need Dr. Hayter to review a some sediment transport modeling work performed

by QEA, for the Patrick Bayou Superfund site located in Deer Park, Texas. Dr. Hayter anticipates this review to take about one week. Can you please help me provide funds for this effort, as I am having a little trouble getting an IAG directly for Region 6?

Thanks in advance for your help,

Phil Allen
